

Chapel Builders of California

We are currently in the middle of re-wiring the home of Pastor Weldon Chambers and his wife Rose. The home has aluminum wiring, which has been a problem in many homes and is no longer used for the wiring of a home. We are installing new copper wiring throughout the home. It's not fun but being here with the Chambers is! 😊

We are currently behind schedule by a couple of weeks but luckily for us Our next project is delayed due to permits taking longer than expected.

We'll head to Concord when they are ready and be working there at least 4 weeks.

We are so blessed to be busy. We love it. We have been to Redlands to help the Church remodel their stage area, we left there to go and help the pastor of the Barstow Church with some things at their home and are now in Mojave, working on the Pastors home here. It's great helping our sister churches and their pastors knowing that they give so much to us and it is such a blessing to give back.

Our truck is a good one but is older and has been giving me fits. It needed a new turbo (done) then a bad hose (done) now coding bad sensor, if not it's going to the dealer to see a real mechanic 😊 I did the turbo and these other repairs myself and I'm not liking this mechanic stuff. Anyway please pray that we get it all repaired before we leave for back east this summer for several projects. I do have about 3,000 in preventative stuff I would like to do if possible so please pray with us that God will provide for this need.

Thanks so much for all your prayers and support!
