Concord MBC & Hayward MBC
Bathroom remodels starting
July 7th

Hillcrest MBC Oregon city, OR
re-roof August 29th

Macedonian Project Bogalusa
LA September 17th

June 28, 2016

I'd like to thank all of you that have been praying for us this past month. I know that many of you pray for us on a regular basis and it shows, by the way that our God takes care of us and provides on the projects that we do. He opens and closes doors on a regular basis and we hope that we are in tune with Him and the work that He has for us. This past month many of you have been praying for my health and I cannot tell you how much it means that you have cared enough to take the time to lift this need to our heavenly father.

Last year I had to have a stent put in and this past month I started having pains again, so over this past month they've tried medicating me, then they went in and put one stent but while in there they found another area that needed stenting but was hard to get to. So after another couple of weeks of trying meds they decided to go in and put the other stents to take care of the blockages. All that said, I'm feeling much better and I feel like

they finally got me cleaned out. We won't be going back to work for another week but thankfully we are working together with some great builders that can take up part of the load. Again I say thank you, thank you... for all of your prayers. Please keep us in your prayers for a full healing and for the work that God allows us to do.

Since finishing the work done in Jackson, when able I've been doing repairs at our church in Fresno and doing some much needed repairs on our trailer... The McFarland project was put off and we will be rescheduling that one.

Need:

One of the things that we've been doing a lot of, is tile work. We've been using a saw that I bought when I was building my home about 9 years ago. It's a good saw and still works, the problem is that it's a huge saw. I only have so much space in my truck and trailer to carry tools, so I usually try to figure out what to take to each job and then try to fit those tools in the space I have available. When we need the tile saw it really limits what else I can take. I've found a saw that would meet our needs and is much smaller. The saw costs \$900. If anyone would like to help with this please let me know.
